

Cross References

1 Images

To cross reference to an image you should prefix your tags with `fig`, eg Figure [1.1](#)

Figure 1.1: LiL logo with blue background.

To do this with `\includegraphics` you need a fenced div: Figure [1.2](#)

Figure 1.2: Captions for `\includegraphics` go here

2 Sections

To cross-reference sections use the `sec` prefix, eg Section [2.1](#)

2.1 Code output

Use the `label` chunk option to make output cross-referencable.

To cross-reference tables use the `tbl` prefix, Table [2.1](#)
